FOR THE FUTURE

# Grasses in field crops : sharing diagnosis, develop direct control solutions and deploy their integrated management

## Abstract

The GRAMICIBLE project aims to help reduce dependence on herbicides. Its first objective is to establish a precise, shared diagnosis, on a regional scale, of the problems associated with grassy weeds (with or without known resistance). The second objective of the project is to evaluate/characterize/develop the most rapidly accessible levers, whether or not combined with herbicides.

All these new references, as well as already operational levers such as prophylactic practices, will feed into the various forms of transfer at national and regional levels that cover the third objective.

This project brings together technical organizations specializing in field crops, including ITAs, ACTA, INRAE and the heads of agricultural development and training networks.

## Actions

**Action 1 :** mapping of problems weeds and summary of resistance recommendations

**Action 2 :** herbicides and precision spraying (including robots)

**Action 3 :** mechanical weeding (excluding robots) and mechanical/herbicide spraying combinations

**Action 4 :** transfer and deployment with technicians and farmers

**Action 5 :** piloting, animation, steering committee

## TECHNICAL MEMO

### Call for projects:

Plan d'Action stratégique pour l'anticipation du potentiel Retrait européen des Substances Actives et le Développement de techniques Alternatives pour la protection des cultures (PARSADA)

### Project leader:

Project duration: 42 months

Start/End of project:

01/07/2024 – 31/12/2027

### Partners:

- ACTA, Centre Français du Riz (CFR) Fédération Nationale du Négoce Agricole (FNA), inov3PT, INRAE, ITB La Coopération Agricole Métiers du grain (LCA-MdG), La Coopération Agricole Luzerne de France (LCA-L), Lycées agricoles Terres Inovia, UNILET

### Other technical partners:

- Association Contrat de Solutions
- Végéphyl

### Partners associated with the steering committee, not funded:

- FNAMS, FRANCOPIA

### Providers:

- The 3 regional seed potatoes growers :
  - Comité Centre et Sud
  - Bretagne Plants
  - Comité Nord Plants de Pomme de Terre

### Financial support:

Le PARSADA est financé dans le cadre de la stratégie **écophyto**

**écophyto**  
Réduire et améliorer l'utilisation des phytos
